KEY FEATURES

Work Assignment and Tracking
Document Management
GIS Integration
ePayment
Wireless Mobility
MS Office Interfaces
Identity Management
Distribution List Management
XML Web Services

MANY COMMON BUSINESS FUNCTIONS have been built into the core framework of POSSE. This means that when you purchase POSSE, you get a product that includes integration to e-payment, GIS, Authentication, and more. In fact, all of the following common business functions come pre-built in POSSE:

GIS Integration
ePayment
Wireless Mobility
MS Office interfaces
Identity Management
Distribution List Management
XML Web Services

Having these common business functions ensures that you will **rapidly** implement a powerful, yet flexible work management solution. From this advanced starting point, any large scale BPM-oriented implementation can be delivered quickly and easily.

USED BY THOUSANDS of front counter staff, inspectors, enforcement personnel, and other agency staff, POSSE manages real work in organizations all across North America. POSSE configuration is point-and-click simple, and it doesn't require programming knowledge or experience. In fact, business users can be trained to do the configuration themselves.

POSSE customers include:

State of California, where POSSE is deployed as the Alcoholic Beverage Control system

City of Dallas, Texas, where POSSE is used as the Land Management System

Province of British Columbia, where POSSE is deployed as the enterprise wide eLicencing solution.

CUSTOMERS

State of California
