

eLICENSING

IN TODAY'S DIGITAL world, citizens, customers, agency staff, and legislators expect quick and easy service to be the norm. The assumption is that all government issued licenses and permits should be available online, and that the customer should be able to apply for a license at any time. Now all of these expectations are possible. **POSSE eLIC** is an agile **COTS+** software product from Computronix that delivers Enterprise wide eLicensing across all of your departments and agencies. Implementation is a quick, and ongoing configuration and changes can be done by your own agency staff.

EXISTING CUSTOMERS who currently use the **POSSE eLIC** system are extremely pleased with the power of the software, as well as with the flexible manner in which their own internal business users can configure existing work flows. Those same users can even create completely new work flows to meet changing legislation and evolving patron needs. **POSSE eLIC** customers include:

Province of British Columbia, where POSSE eLIC is used as an Enterprise wide solution;

City of Dallas, TX, where POSSE is used for a wide range of permitting and licensing needs, from issuance of building permits to taxi cab licenses.

powered by **POSSE® Technology**

THE POSSE FRAMEWORK is an **enterprise work management system**, utilizing the Oracle environment, that simplifies and speeds the effective automation of your business processes.

Enterprise solutions that are currently based on the POSSE framework include:

Enterprise eLicensing system by the Province of British Columbia.

Enterprise Work Management solution by the City of Edmonton, Alberta.

IN ADDITION TO BEING a state of the art BPM-oriented business process automation framework, POSSE also serves as the foundation for many **COTS+** product offerings, such as:

COTS+ Software

COTS+ is a category of software that will give your agency **immediate functionality**, based on current best practices, **PLUS** the ability to configure the solution to be a perfect fit to your changing business and legislative needs. **POSSE eLIC** configuration is a smooth and simple process that can be carried out by your own Agency staff.

Changing legislation is no longer a problem or concern, nor does it represent a huge cost and time commitment. **POSSE eLIC's** quick and easy configuration features will vastly extend the life of your system, thus reducing overall cost.
