

E-Learning Is Here. Computronix Has It.

“Effective, Self Paced, E-Learning”

Computronix is pleased to offer its first e-learning course, *Infomaker 8 and POSSE Report Writing*. Students are guided through 39 interactive modules that introduce students to effective report writing tips and techniques as well as how to seamlessly integrate those reports into a POSSE® or Earthwon® implementation. If you have been thinking about improving your report writing skills or those in your organization, make sure to give us a call for more information.

- create reports
- connect to databases
- use queries
- efficiently format reports
- work with POSSE's data structure as exposed in the API
- integrate reports into POSSE or Earthwon
- report criteria windows
- reports for tabs on POSSE
- object instance windows

PREREQUISITES

- It is recommended, but not required, that the student be familiar with basic SQL.
- It's also recommended, but not required, that the student has completed Basic Configuration Training.

TOPICS

- How to use basic report writing options in Sybase's InfoMaker® report writing tool.
- How to use advanced reporting options in Sybase's InfoMaker report writing tool.
- How to understand relational database concepts in the POSSE reporting context.
- How to use SQL functions in the POSSE® reporting context.
- How to integrate reports into POSSE.
- How to build report criteria windows.
- How to develop reports for POSSE object list windows.
- How to develop reports for tabs on POSSE object instance windows.
- How to work with POSSE's data structure as exposed in the API.

EXPECTATIONS

The e-learning InfoMaker course is designed to incorporate hands-on exercises for use in the InfoMaker application. For those students that are not familiar with InfoMaker or relational databases, the modules start with an introduction to simple Infomaker functionality and then move on to simple reports development. From there the modules move into how to use more advanced report development techniques and how to incorporate developed reports so they can integrate seamlessly in a POSSE or EarthWon implementation.

If the students are more knowledgeable, all the modules will help emphasize and reiterate tips and techniques so that students can effectively develop and produce operational forms, statistical reports or custom on-screen tabs, as well as manage and maintain other existing reports needed in your business.
