# LAND MANAGEMENT SYSTEM

AT A GLANCE

Government agencies need a simple, streamlined solution for processing land permits, scheduling building and land inspections, enforcing code requirements, and licensing businesses in their jurisdictions. POSSE LMS is a Commercial Off-the-Shelf (COTS) product that also allows additional configuration capabilities – meeting your agency's needs with powerful, pre-configured workflows. POSSE LMS makes the lives of your staff and citizens easier and more efficient.

POSSE LMS includes workflow covering the core business areas of Business & Professional Licensing, Permitting & Inspections, Planning, Code Enforcement, and ePlans.

- Our **Business & Professional Licensing** module handles all business licensing needs for your jurisdiction, including application, amendment, enforcement, and renewal activities.

- Our **Permitting & Inspections** module tracks your permit activity and associated inspections from application to renewal and expiration.

- Our **Planning** module automates and manages the e-government processes in your planning department.

- Our **Code Enforcement** module handles complaint tracking, order/violation issuance, and case file prosecution.

- Our **ePlans** module provides powerful workflow and processing capabilities integrated with a robust Electronic Plan Review markup tool.
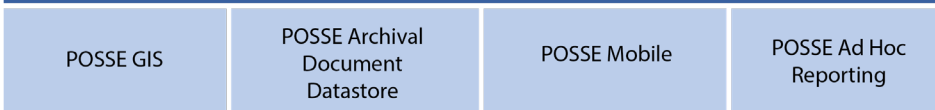

POSSE Land Management System automates workflows associated with building, planning, engineering, code enforcement, and other land management activities.
