POSSE®

CLOUD

AT A GLANCE

High Reliability not High Maintenance

POSSE Cloud provides secure and reliable access to your POSSE solutions without the budget draining maintenance, time, personnel and cost demands of depreciating on-premise infrastructure.

Stringent Security

POSSE Cloud is engineered to comply with high security standards and regulatory requirements:

- Architected to federal compliance standards
- **FedRAMP** & **ISO 27001** certified data centers audited to **SOC 1 & 2** standards
- Data encryption in transit and at rest

Data Protection & Disaster Recovery

POSSE Cloud's geographically distributed hosting services provides maximum protection against natural disasters, cybersecurity attacks or statewide outages:

- Frequent backups include transaction-consistent database protection
- Continuous production data replication
- Regular recovery testing

Performance Plus

Leveraging Microsoft's global Azure platform, your POSSE Cloud solution delivers **99.9% uptime** with performance scaling and redundant load-balancing:

- Dedicated development, test, training, & production environments.
- Programmatic 'self healing' infrastructure
- Real-time health & performance monitoring

Single Tenant Solution Advantages

Your POSSE Cloud solution combines the scalability and reliability of the public cloud, with the performance and security benefits of your own dedicated environment:

- Isolation of client data for better security
- No performance lags from shared resources
- True client autonomy; no forced upgrades

Service Focused Expertise

Each POSSE Cloud implementation is fully supported by a dedicated Service Manager and a team of skilled and knowledgeable technical staff with appropriate Microsoft Azure and Oracle certifications – all of whom exemplify the mission to 'respect, trust, and serve' that has contributed to our unmatched success rate in providing client services.

- ✓ Complete support of your entire POSSE solution

- ✓ Rigorous security, complying with NIST, FedRAMP, ISO, CJIS, and SOC standards

- ✓ 99.9% uptime availability

- ✓ Real-time system health and performance monitoring

- ✓ Automated vulnerability scanning and real-time threat detection and mitigation

- ✓ Dedicated Service Manager

- ✓ Microsoft Gold Partner and Azure-certified support staff

- ✓ Agility & Deployability: Faster setups, easier upgrades, workloads in multi-cloud environments, seamless application migration, more portability without vendor lock-in

- ✓ Kubernetes containerization equips effective load balancing, self-healing, horizontal scaling, automated resource management and rollouts.

Superior Return on Investment

POSSE Cloud leverages the elasticity of a global computing platform, eliminating prohibitive capital investments while also reducing operational and maintenance costs:

- Reduced hardware, software, data center, maintenance, and upgrade costs
- Reduced reliance on highly specialized internal staff to configure & maintain systems

In today's world, more and more government organizations are recognizing the value of the cloud. With POSSE Cloud, you leverage all of the functionality of award-winning POSSE software solutions with high security, reliability, availability, less maintenance, and lower capital expenditure.
