

LICENSING

Make License Processing Easy

Our pre-configured POSSE Alcoholic Beverage Control (POSSE ABC) Licensing Module serves as a one-stop management solution for all ABC license-related activity for your agency. The module supports an unlimited number of license types, based on your business rules. Pre-configured ABC licensing workflows are also applicable for gaming and marijuana/cannabis licensing.

An Efficient Workflow Solution

POSSE ABC Licensing tracks a license through the entire lifecycle, from application intake to approval. The system's powerful, configurable workflow guides the license to the appropriate parties, such as clerks or inspectors, to push the license through necessary processes for both new and transfer applications.

Complete License Management

Each license record includes all license history, current license status (active, expired, closed, suspended, revoked), license holder information and history (including corporate ownership details to any level, for background check purposes), locations related to the license or licensees, and other connected information. The relational nature of POSSE gives your agency a holistic picture of all interconnections between the people and properties in your purview.

Empower Your Manufacturers

POSSE ABC Licensing makes license management easy for manufacturers (e.g., brewers, vintners) as well. Through the public website, they can submit brands for registration, determine which distributors are permitted to sell their brands, and keep on top of all license submittals and renewals.

Proactive Renewal Processes

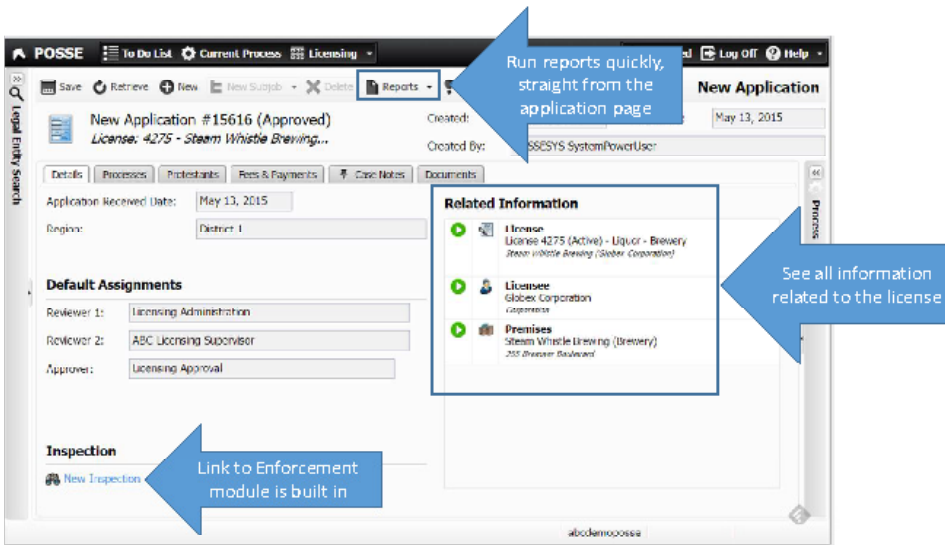

The module alerts your agency workers in advance that licenses are about to expire. Your staff can automatically generate template-based email or letter notices to license holders when it's time for license renewal, with instructions on how to renew via the public website – streamlining the process for both licensees and your agency.

Collect Fees and Penalties

POSSE ABC Licensing interfaces with your payment solution to collect any required fees, including basic license fees, late penalties, or any other required financial transactions.

AT A GLANCE

- ✓ Fully configurable ABC-oriented license workflow, with an unlimited applicability for other license types (including gambling/gaming and marijuana/cannabis, so you can support **any** types of licenses your agency monitors
- ✓ Interconnected with the POSSE ABC Enforcement module, enabling seamless connection to related Alcohol Enforcement inspections activities
- ✓ Automated, template-based communications with license holders save your agency time and money
- ✓ Interfaces with payment solutions and background check solutions to support all license-related activity
- ✓ Reporting, including robust searches with export to Excel capability, dashboard style reports and ad-hoc reports, is available straight from the main interface – no need for a separate reporting solution

“Computronix is wonderful. They implemented the project on time and in budget. We are very pleased with the product.”

Mary Freeman
General Manager
Liquor Control and Licensing Branch (LCLB)
Government of British Columbia

POSSE ABC Licensing tracks legal entities and ownership structures. The public website interfaces seamlessly with the internal system, allowing 24 x 7 access for customers to apply for and manage their liquor licenses while also allowing your agency staff to fully manage licensing tasks.
