

WebUI

AT A GLANCE

Leading Edge Application Standards

WebUI utilizes established development libraries from Facebook (ReactJS) and design standards from Google (Material Design); resources proven to facilitate the agile development and deployment of ‘native-feeling’ responsive interfaces in all of the current operating systems and browsers.

Responsive Design

WebUI gives users the ability to simultaneously create easy-to-use and elegant customer service workflows fully compatible for all mobile, tablet and desktop devices—with each interface retaining the key user experience features native to a customer’s preferred device.

Seamless Multilingual Support

WebUI facilitates dynamic translation for every aspect of your customer service portals from the initial presentation layer to user guidance prompts and dynamic response text.

POSSE 7.4 upgrade includes WebUI

WebUI is included with your upgrade to POSSE 7.4, equipping your agency with all of the tools and technology required to design, build and launch powerful service delivery portals for your citizens.

- ✓ Sophisticated customer portals with no coding expertise required
- ✓ Seamless flow to card layouts for optimal mobile device usability
- ✓ Single page applications optimal for high latency networks. Feels more like an app than a webpage.
- ✓ Integrated add-ons for GIS, ePlans document uploader and more!

Dynamic Customer Portal Creation

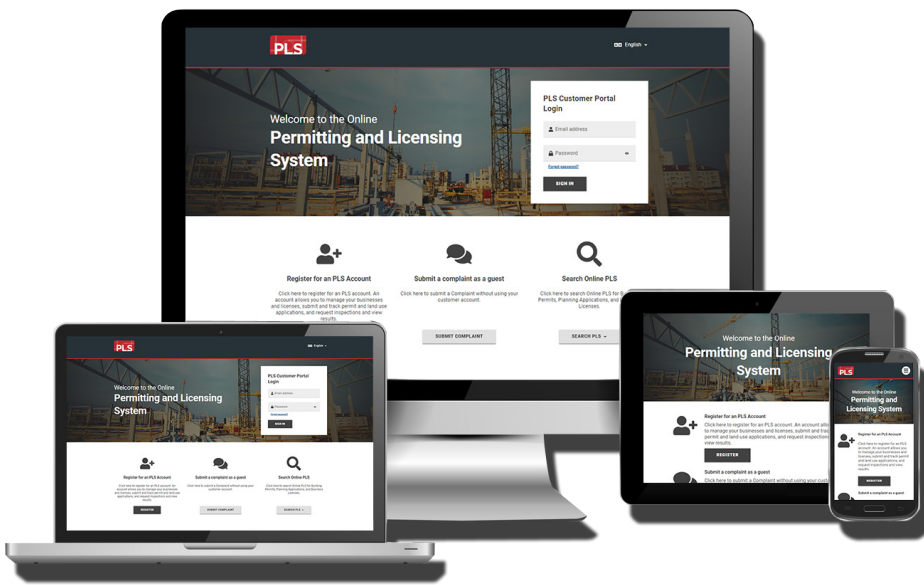

Powered by our award-winning POSSE Platform, our easy-to-use WebUI toolset gives end users with minimal technical expertise the ability to design and build feature rich customer portals.

No Coding Skills Required

Leveraging POSSE’s powerful workflow automation capabilities, WebUI eliminates the need for layout builders to factor for underlying business rules, empowering staff to quickly build and launch robust customer service experiences from a diverse selection of business rules compliant layouts.

WebUI provides easy-to-use tools for customer portal creation, empowering elegant and efficient service delivery experiences.

Powered by POSSE: Winner of 21 International Awards including the Smithsonian Institution's collection of ground-breaking software.

Join the growing number of Computronix customers who have chosen WebUI for building their Customer Portal web applications.

Sophisticated Customer Portals That Feel Like Interactive Mobile Apps

It is now possible to provide mobile friendly government services with the speed, convenience, and error-free efficiency associated with today's leading ecommerce brands--courtesy of WebUI.

Powered by POSSE, our award-winning workflow automation platform, WebUI makes easy and agile customer service portal creation an immediate reality for your government agency.
